

Call for Papers for the Special Issue of IEEE Wireless Power Transfer Conference and Expo 2025 (WPTCE2025)

Submission Opening 20 August 2025

Submission Deadline 8 November 2025

Publication Date March 2026

The **IEEE Wireless Power Transfer Conference and Expo 2025 (WPTCE 2025)** was successfully held in Rome in June 2025, showcasing a broad spectrum of technologies and applications in wireless power transfer and energy harvesting.

We are pleased to announce the launch of the new **IEEE Journal of Wireless Power Transfer (J-WPT)**, sponsored by eight IEEE Societies with the IEEE MTT-S and PELS Societies as the major sponsors. The journal is now open for manuscript submissions: <https://ieee.atyponrex.com/journal/jwpt-ieee>.

Authors of papers accepted for presentation at WPTCE 2025 are invited to submit an **expanded version** of their conference papers to the **Special Issue of IEEE J-WPT**. The expanded version must include significant new technical content, such as a more in-depth analysis, additional results beyond those presented at WPTCE 2025, or both. All submitted papers will undergo the same rigorous peer-review process as regular submissions to the journal.

When submitting, authors must:

- Clearly indicate that the submission is an **extended version of a WPTCE 2025 conference paper**.
- Upload the **original WPTCE 2025 paper** as a supplementary file.
- Include a **cover letter** describing the new contributions and the nature of the extension compared to the conference version.

For submission guidelines and manuscript templates, please visit the journal webpage: <https://www.ieee-pels.org/publications/journal-on-wireless-power-technologies/>.

If you have any question, please contact us: jwpt2025.special@gmail.com

Guest Editors (TPC chairs of the WPTCE2025):

Alessandra Costanzo, Alma Mater Studiorum, University of Bologna, Italy

Tommaso Campi, Sapienza University of Rome, Italy
